Inkpress Paper

Inkpress Paper is the professional photographer's source for the ultimate in inkjet media and technical support. Dealing directly with the best paper mills in the world, Inkpress Paper is able to offer its customers the finest inkjet papers and products available, including the company's popular Archival Greeting Card Packs. Each pack contains 20 envelopes and 20 sheets of 7x10-inch Inkpress Duo Matte 80 Paper that has been pre-scored to produce 5x7-inch greeting cards. Designed for printing resolutions of up to 2880dpi, Inkpress Archival Greeting cards feature a 12 Mil thickness, a 99% Brightness and 215 GSM Weight, and they're 100% acid- and lignin-free. With Inkpress Paper's Archival Greeting Cards, every photographer can print like a pro. (www.inkpresspaper.com)

Corel

Not all high-end image editing programs cost an arm and a leg. At \$79.99, Corel's Paint Shop Pro Photo X2 Ultimate has the widest selection of photo-editing features, from automatic tools for quick fixes to precision controls for fine-tuning. Some of its new features include support for more than 250 Camera Raw formats, a background remover plug-in, and 150 new photo frames, photo edges and picture tubes. But, that's not all. The new Paint Shop Pro Photo X2 Ultimate also ships with several bonus items, including a 2GB USB flash drive and Corel Painter Photo Essentials 4 and Media recovery software. Why not download a demo version and check it out? (www.corel.com)

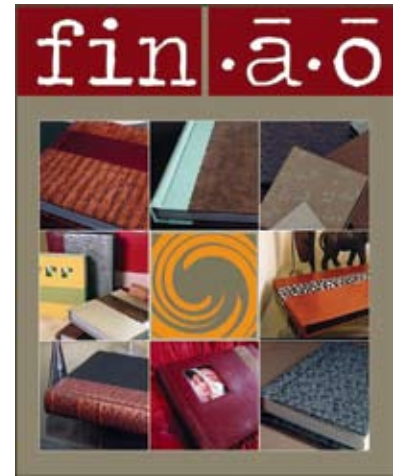

Digital Silver Imaging

Are high quality black-and-white prints a thing of the past? Not at Digital Silver Imaging. By combining traditional black-and-white papers and chemistry with the laser-based technology of the Durst Theta 51 wide format printer, Digital Silver Imaging is able to offer photographers museum-quality, true black-and-white prints from digital files. Its unique process eliminates all the unwanted consequences of generating black and white on inkjet printers. In fact, you won't find any tone disruption, color variance, ink reflection or unwanted texture on Digital Silver Imaging black-and-white prints. Available papers include the unique HARMAN Galerie FB Digital, a panchromatic Baryta fiber-based paper; and Ilfospeed Digital RC, a panchromatic resin-coated paper suitable for portraits, social events, advertising, retail and commercial applications. Finao Online

Are your clients looking for something with a little more pop and pizzazz, without sacrificing high quality workmanship? Look no farther. Finao's one-of-a-kind albums will surpass the expectations of even your most highly discriminating client. Designed from the ground up with you, the photographer, in mind, Finao uses the finest quality materials available to create albums with attitude. Its Elements line of self-mount albums, for example, features contemporary styling, the hottest colors and six unique man-made cover materials. Handmade to order, Elements albums are available in landscape and portrait formats, in sizes from 3x3 to 11x14 inches and 10-, 20-, 30- and 40-print capacities. Check out the company's cool website for additional cutting edge products. (www.finaonline.com)

Mitsubishi Imaging

Mitsubishi Imaging (MPM) has expanded its eco-friendly line of Diamond Jet inkjet media products to include Universal Scrim Vinyl, Adhesive Vinyl and Canvas. Compatible with all professional-level printers and inks on the market, the new 100 percent cotton Canvas is an ideal choice for photographers who want to generate digital fine art photography, Gicl e, and archival and keepsake prints. The new Canvas is 100 percent cotton and stretches easily while resisting cracking. The company's Scrim Vinyl and Adhesive Vinyl are better choices for display advertising, POP, photo-quality posters and exhibit signage. All Mitsubishi Diamond Jet papers absorb the heavier ink lay down of wide format printers and are available in rolls. Diamond Jet Canvas papers also are available as sheets. Hahnem hle USA

Every wedding and portrait photographer should take a close look at the new, easy-to-use Gallerie Wrap System from Hahnem hle USA. Designed to accept canvas products, such as Hahnem hle Daguerre Canvas 400gsm or Monet Canvas 410gsm, the new system includes fasteners and stretching frames that accommodate most popular imaging formats. Hahnem hle Gallerie Wrap stretching frames are available in two sizes. The Standard system has a frame depth of 1¼ inches and stretching bar lengths from eight–24 inches. The Pro version has a frame depth of 1¾ inches and lengths from eight–60 inches. The new Hahnem hle system requires no special tools and is so easy to use, photographers can create professional quality gallery wraps in as little as five minutes. (www.hahnemuehle.com)
